**DENTAL PROSTHETICS, INC.**  
CREATING BRIGHTER SMILES SINCE 1969

With so many dental material choices, how do clinicians select the right material for their ideal restorative needs? Come learn a straight forward, simple-to-follow guide to product selection that will maximize your restorative success!

## We will cover the following topics in this course:

- What are the critical questions that must be answered before you chose a restorative material?
- Discover the GPS for perfect material selection.
- Learn how to evaluate material strength and the needs of the restoration shape, shade and position.
- Which materials are best for abutments.
- What risks are involved in product selection?
- Monolithic versus veneered.
- Ceramics versus alloys.
- Why stump shades are necessary.
